RECOMMENDED PAINTING SYSTEM

- ▶ **How to Prepare the Surface:** Clean the surface with a wire brush to remove loose paint, dust, grease, algae and fungus. After that, wash the surface down with Kamo Biowash to prevent reoccurrence of microbiological growth.
- ▶ **Smoothering the surface:** Kamocare / Kamoplast wall putty is recommended for leveling & smoothering the surface. It is effective in removing holes, dents, cracks and minor undulations. Larger cracks may be filled with a mixture of white cement and sand in the ratio of 1:3.
- ▶ **Priming:** If the surface is highly absorbent, then, once Kamocare / Kamoplast wall putty is to be applied, you may use Kamo Exterior Sealer, In the case of fresh surface or repainting surfaces, apply one coat of Kamoprime Exterior Primer in the ration of 1:1.
- ▶ **Top Coat:** Apply 2 to 3 coats of Weather Supreme / Weather Classic by diluting 1 liter of it with a maximum 400 ml water. OR apply 2 to 3 coats of Kamosheild by diluting 1 liter of it with a maximum 750 ml water. Keep an interval of 4 to 6 hours between the two coats. An additional coat is required for dark shades and horizontal surface like window top & ledges etc.
- ▶ Please see the instruction on Container for dilution ratio of the rest Product.

PRECAUTION

- 01 For freshly plastered surfaces three months are required for curing before the painting of the walls.
- 02 For highly absorbent and chalky surfaces Kamo Exterior Sealer is recommended.
- 03 Paint procedure should not be applied on continuous seeping & damp surface.
- 04 Use of Kamdhenu Primer is mandatory fo all exterior paint surfaces.
- 05 Use Kamdhenu Waterproofing System before painting on the seepage and damp surfaces.

KAMDHENU WATERPROOFING SYSTEM

To prevent recurrence of dampness, sealer, efflorescence and microbiological growth, use following products before painting.

KAMO SHORASEAL Sure protection from Efflorescence.

KAMO PROOF LW In Plaster **KAMO CRETE** with Paint application.
